POWER FLEET®

The Powerfleet Advantage

POWER𝛀FLEET® delivers the intelligence you need to make better decisions and stay connected to your assets and freight.

Why companies choose Powerfleet?

- Organizational financial strength & stability
- 25+ Years of experience within the telematics industry, globally
  - PowerFleet designs, develops, and manufactures our own HW and SW solutions

Seamless Integration

- Platforms are highly configurable
- Robust analytics with customizable reporting

Solution Service

- Robust API's and EAI
- Custom integrations
- Comprehensives TMS integrations with McLeod and TMW

White Glove Service

- Dedicated team to support pre-sale, onboarding, and ongoing relationship

Success Project - Walmart

Real Time End to End Visibility

Walmart is using Powerfleet's IoT devices to track containers in real time from origin to destination.

The world's largest retailer continues to drive innovation and demand supply chain excellence. They have been a long-time strategic partner for Powerfleet with 44,000 IoT devices helping track their containers, fleets and industrial assets.

Asset Utilization
As assets became scarce at ports, Walmart was able to track and improve utilization by using advanced cameras and sensors that ensured assets were not being lost, idle or underutilized.

Powerfleet IoT Case Studies

Ag-Tech Company

- A leading ag-tech company that develops innovative "Vertical fields" solutions for the urban ecosystem. (Ultraviolet & Humidity)

Governmental

- The Ministry of Health in Israel, launched an operation, that was carried out in a race against time to vaccinate children for COVID-19.

Logistic Center

- Pharmaceutical trading house company –storage and transportation of medicines and drugs for Pets /Animals.

POWER FLEET ®

Powerfleet IoT Case Studies

Healthcare Services

- One of Israel's biggest healthcare "Maccabi HMO", tracking "Cooling Boxes" containing pathological samples. Inland shipments from healthcare centers to a central lab.

Medical Equipment

- Logistipharm, a commercial center specializing in storage, distribution and shipping of medical equipment and medicines to pharmacies, hospitals, and private customers, using our platform for monitoring and controlling the temperature conditions during storing and distribution.

Supermarket Logistics

- Dia in Spain implemented a solution for 1000+ refrigerated trucks, providing real-time monitoring of the location & temperature of shipments from origin to destination, alerting when the compartment's door is opened or there is deviation from predefined temperature.
